YOUR PARTNER IN AUTOMATED RECORD KEEPING.

Scale-Tec's HarvestMate™ Grain Cart Bundles provide the reliable technology and practical functionality you need to automatically record every grain cart load with exceptional accuracy. Our rugged products adapt to fit your current scale system, taking the work out of data collection and eliminating human error.

HARVESTMATE™

Grain Cart Bundles

7602468

AN ALL-AROUND BETTER WAY TO TRACK HARVEST DATA

CAPTURE EVERY GRAIN CART LOAD WITH THE REAP™ APP

The REAP app serves as your automated hub for harvest weight records and is a key component of every HarvestMate bundle. REAP pairs with Scale-Tec's POINT® scale indicator to record and track your grain cart weight, truckloads, field totals and storage inventories seamlessly across multiple devices in real time. REAP automatically uploads the data to your cloud dashboard instantly — or as soon as a stable internet connection becomes available. The data is conveniently organized into the standard **Grower-Farm-Field** format, making it widely understood and easy to use. From there you can export reports, integrate the data with a growing list of connected platforms, or keep it for your eyes only.

Connects to your POINT® indicator via Bluetooth® wireless technology

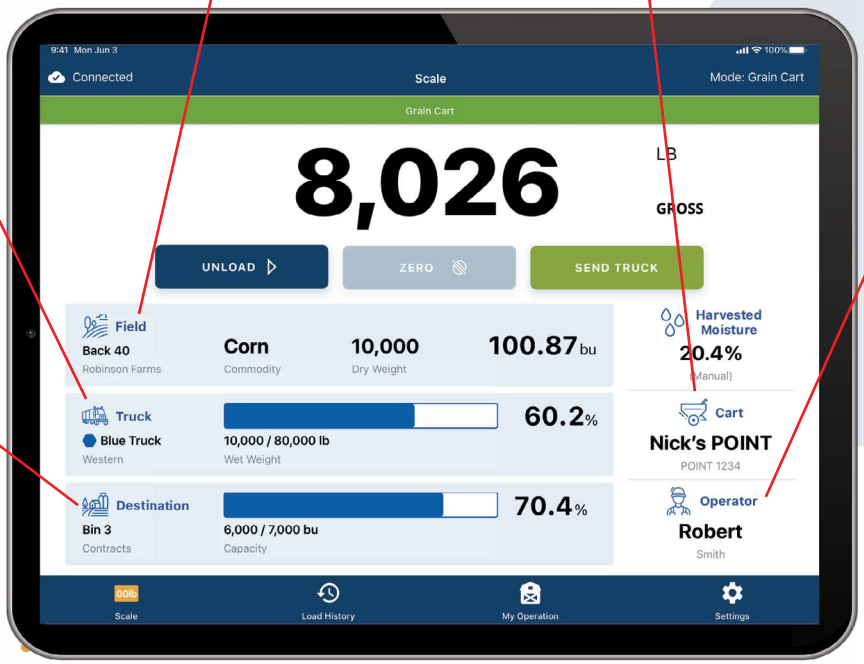
FIELDS
Records and tracks field totals and creates yield total from an unlimited number of fields and locations.

CARTS
Remotely view Field, Truck and Destination selections on the grain cart, make corrections and see and tare grain cart scale.

OPERATORS
An unlimited number of operators can be added to the app for accurate tracking.

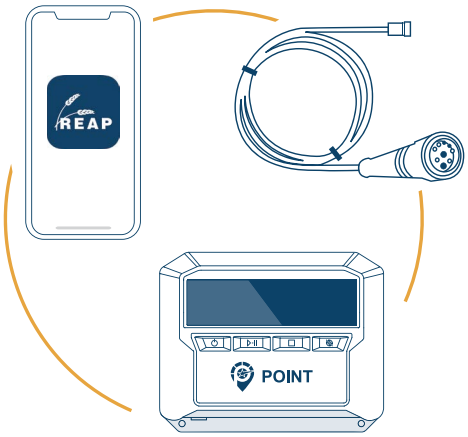
TRUCKS
Monitors truckloads from the field and reconciles truckloads to co-op and elevator records.

DESTINATIONS
Tracks inventory for on-farm storage or for deliveries to co-ops or elevators.



CHOOSE YOUR BUNDLE

HARVESTMATE™ ISO



BUILT IN ACCURACY

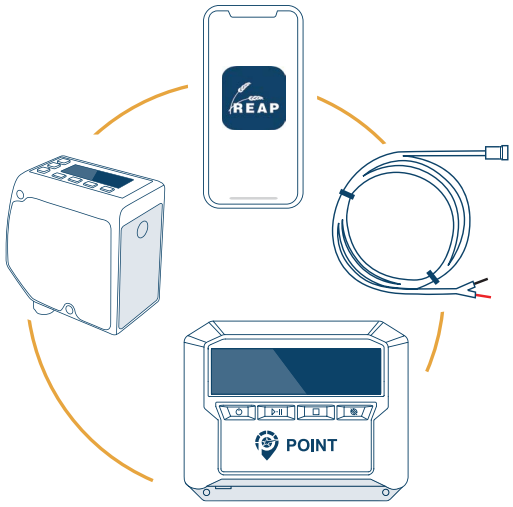
Available for John Deere, Case IH and New Holland ISO-enabled tractors. This bundle detects when the grain cart is unloading by recognizing the status of your tractor's PTO through the ISOBUS connection. The scale automatically records the weight of each grain cart load in your REAP harvest inventory account.

This bundle includes:

- POINT® scale indicator
- REAP™ subscription
- ISO cable (ISOBUS)
- PowerUp™ feature activation (a button in the mobile app)

OR

HARVESTMATE™ PROX



LASER GUIDED DETECTION

Available for makes and models of tractors that are not ISO-enabled. This bundle recognizes when the grain cart is unloading by using a laser sensor to detect grain cart and truck proximity. The scale automatically records the weight of each grain cart load in your REAP harvest inventory account.

This bundle includes:

- POINT® scale indicator
- REAP™ subscription
- PROX™ harvest sensor
- Standard 12v cable

Also available: HarvestMate™ Custom Bundles

We will modify our existing bundles to meet the needs and equipment capabilities of your operation.

Apple iPhone or iPad required for use. Patent Pending.

SCALE-TEC

SCALE-TEC'S HARVESTMATE™ GRAIN CART BUNDLES:

- Eliminate weight recording mistakes
- Automatically record and save data
- Adapt to fit your equipment
- Improve efficiency
